Setup and Installation

1 Prerequisites

- Python 3.9 or higher
- pip (comes with Python)
- An Anthropic API key from console.anthropic.com
- Git installed

2 Installation Steps

1. Clone the repository

```
git clone https://github.com/YOUR_USERNAME/emotion-capture-ai.git
cd emotion-capture-ai
```

2. Install all Python dependencies

```
pip install -r requirements.txt
```

3. Create the environment file

Create a file named `.env` in the root of the project folder. Add the following line:

```
ANTHROPIC_API_KEY=your_actual_key_here
```

Do not commit this file. It is already listed in `.gitignore`.

4. Run the application

```
streamlit run app.py
```

5. Open the app in a browser

Streamlit will automatically open a browser tab. If it does not, navigate to:

```
http://localhost:8501
```

3 Environment Variables

Variable	Description
ANTHROPIC_API_KEY	Your secret API key from console.anthropic.com . Required for all AI features to function.
